TechnoEdgeIT is a company dedicated for providing software solutions and IT consulting services to enrich the business process of global and local entrepreneurs. Our mission is to partner with clients to enable their success, through our superior software development services. We adapt the best practices, industry standards and the latest technology trends to transform raw business objectives into comprehensive software solutions.

How do you benefit from software solutions and IT consultancy?

Our strategy

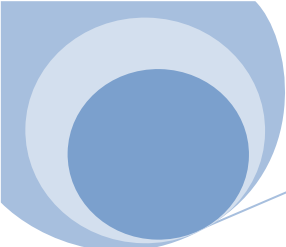

TechnoEdgeIT leverages its experience and customer-centric flexible business process to create value for your business in terms of quality IT solutions at considerably lower costs. We believe that it is possible to enrich and optimize business in any scale through technology solutions which are driven by precise analysis and design.

Raw business requirements

Our process

From the inception, we maintain a constant communication with our clients throughout the project with regular updates allowing them to experience how their business requirements are transformed into fully-fledged software solutions. Our process is open for adapting changing requirements and incorporating them within ongoing development cycles.

Our assets

We believe that it is essential to have right people for right job so that we can execute our process seamlessly integrating with client requirements. Our company is driven by a group of diversified, talented IT and business professionals who are expert in subject matters with the proven experience.
